

Farm Neck Golf Club INTERNSHIP PROGRAM 2023

Start Date: APRIL 1, 2023

Salary: \$18/HOUR + HOUSING

EXPLORE THE NATURAL BEAUTY OF MARTHA'S VINEYARD

Farm Neck Golf Club, considered to be one of the premiere golf experiences in the Northeast, is a semi-private golf club set in Oak Bluffs, Massachusetts on the island of Martha's Vineyard. Founded in 1979 the actual design was a collaboration of three architects, Geoffrey Cornish, Bill Robinson, and Patrick Mulligan. The club is unique in comparison to other high caliber courses with multiple levels of membership while allowing public play during certain times of the day. We strive to provide a high-end private club experience accompanied by a non-exclusive atmosphere. Whether a former president, celebrity, professional athlete, local plumber, or new to the game – all are welcome.

The membership believes in constant improvement and investment into the golf course and maintenance department. Recently we installed a two wire Rainbird IC system with HDPE pipe throughout. Greens rebuilt to USGA specs with A1/A4 bentgrass. Reconstructed maintenance facility with a new fleet of state of the art equipment.

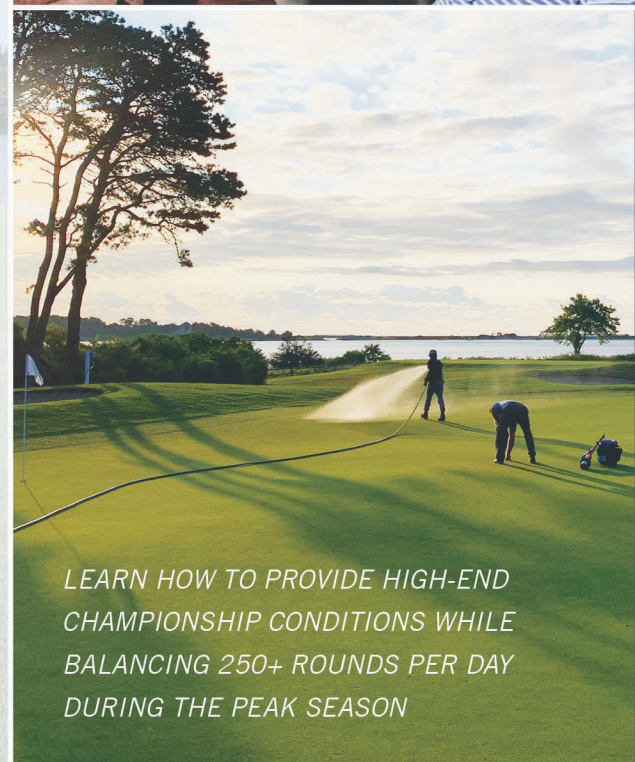

In the Fall of 2023, the Club is set to begin a full golf course renovation. This includes, but not limited to:

- ALL NEW TEE BOXES
- FAIRWAY RECONTOURING
- ALL NEW BUNKERS INSTALLED WITH BETTY BILLY BUNKER LINER
- GREEN RECONSTRUCTION & EXPANSION
- NATIVE GRASS ESTABLISHMENT
- POND & OCEAN EROSION CONTROL
- IRRIGATION INSTALLATION
- DRAINAGE
- TREE CLEARING AND PRUNING
- NEW SHORT GAME AREA

At Farm Neck instead of a top-down approach we are more circular in our management style. Daily meetings are held between the Superintendent, Assistants, Interns, and other managerial staff to discuss key take aways from the day and strategies to accomplish our weekly goals.

Responsibilities Intern can expect to perform and learn:

- OPERATION OF ALL EQUIPMENT
- IRRIGATION TROUBLESHOOTING
- DESIGNING & SETTING IRRIGATION CYCLES
- MOISTURE MANAGEMENT
- PEST IDENTIFICATION & MONITORING
- SPRAYER & SPREADER CALIBRATION
- BUILDING A SPRAY PROGRAM
- IMPLEMENTING CULTURAL PRACTICE PROGRAMS (VERTICUTTING, TOPDRESSING, AERATION, ETC.)
- LEADING SMALL PROJECTS
- EQUIPMENT REPAIR & MAINTENANCE

LEARN HOW TO PROVIDE HIGH-END CHAMPIONSHIP CONDITIONS WHILE BALANCING 250+ ROUNDS PER DAY DURING THE PEAK SEASON

NO EXPERIENCE NECESSARY

CANDIDATES MUST BE ENROLLED OR INTENDING TO ENROLL IN AN ONLINE, TWO, OR FOUR YEAR TURFGRASS MANAGEMENT PROGRAM OR RELATED FIELD

Preferred candidates will be driven and enthusiastic to grow personally and professionally. Our program is designed to prepare the student for a managerial position in the turf industry at the conclusion of their internship.
